

Geneva Day School Community Wellness Pledge
2020-2021 School Year

Being part of a community requires collective responsibility to ensure the health and safety of all students and their families, and staff and their families, and the entire school. To be clear on the School's expectations and community member responsibilities as it relates to health and safety, we have developed this pledge. We are asking each family and staff member to sign and agree to abide by the following protocols and practices.

We agree to:

- Participate in the daily screening of temperature and health-related questions using a Geneva provided Google document.
- If my child, or I, as a staff member, or a member of the family or household is sick with any COVID-19-related or other symptoms, then my child, or I, as a staff member will stay home. I will contact my physician or health care provider for directives to follow, and I will notify the School of the situation.
- Notify the School Office immediately if my child or I, as a staff member, or a family or household member is exposed to someone who has tested positive for COVID-19 and will stay quarantined for a recommended period determined by the local Health Department or my physician or health care provider.
- Before returning to school, send a written statement from my physician, health care provider, or the Health Department indicating my child or I, as a staff member, is not contagious, and cleared to return to school.
- My child, or I, as a staff member, will wear a mask or face covering in the car and building, as appropriate.
- Practice social distancing when on School Property.
- Limit non-essential travel as directed by the state or local governments and inform the Office of any necessary travel that takes place.
- Consult with my healthcare provided about the Flu vaccine in fall 2020 and the COVID-19 vaccine as vaccines become available.
